

Emerson KJ3002X1-BC1 12P0681X092

8-Channel 4-20 mA Analog Input Card

Verified identification and technical data

Manufacturer	Emerson
Model	KJ3002X1-BC1 12P0681X092
Part number	12P0681X092
Product family	DeltaV M-series Traditional I/O
Product type	8-Channel 4-20 mA Analog Input Card
Channels	8 analog inputs
Signal	4-20 mA
Input wiring	2-wire
LocalBus power	12 VDC at 150 mA
Bussed field power	12 VDC at 300 mA
Terminal key	A1

Only information within the cited manufacturer-source scope is reproduced. No unverified rating, dimension, interchangeability or lifecycle claim is added.

Emerson KJ3002X1-BC1 12P0681X092

Replacement and installation checks

- Match the complete model, suffix and hardware revision against the installed unit and approved bill of materials.
- Confirm rack, slot, connector, wiring, channel assignment, sensor or system interface before removal.
- Back up applicable project data and record the original installation before disturbing connections.
- Use qualified personnel and current manufacturer installation, commissioning and validation instructions.
- Do not infer compatibility from similar appearance or a related model number.

Engineer FAQ

How should KJ3002X1-BC1 12P0681X092 identity be checked before ordering?

Match the complete model, part number, suffix, hardware revision and visible nameplate details.

What compatibility information is needed for KJ3002X1-BC1 12P0681X092?

Confirm the installed DeltaV M-series Traditional I/O, carrier or housing, slot, mating connector, wiring and project bill of materials.

What should be reviewed before installing KJ3002X1-BC1 12P0681X092?

Isolate the affected equipment under the site procedure, preserve configuration and follow current manufacturer instructions.

Which application context applies to KJ3002X1-BC1 12P0681X092?

The cited manufacturer source identifies the component as 8-Channel 4-20 mA Analog Input Card; final suitability remains application- and revision-specific.

What must be tested after replacing KJ3002X1-BC1 12P0681X092?

Perform approved diagnostics, channel or communication checks, and required validation before returning equipment to service.

What should accompany a KJ3002X1-BC1 12P0681X092 quotation request?

Provide quantity, destination, required condition, and clear front, side and nameplate photographs.
