

KJ1501X1-BC2 12P2186X042 VE5008

24/12 VDC System Power Supply — Legacy Reference

Verified product identity

Manufacturer	Emerson
Complete model / ordering identity	KJ1501X1-BC2 12P2186X042 VE5008
Product description	24/12 VDC System Power Supply — Legacy Reference

Technical data snapshot

Manufacturer	Emerson
Hardware model	KJ1501X1-BC2
Manufacturing part	12P2186X042
Ordering identity	VE5008
Verification rule	Match input, output, carrier and revision
Operating temperature	-40 to +70 °C
Relative humidity	5–95%, non-condensing
Airborne contaminants	ISA-S71.04 Class G3
Shock	10 g half-sine, 11 ms
Vibration	1 mm peak-to-peak at 2–13.2 Hz; 0.7 g at 13.2–150 Hz

Procurement and replacement checks

- Match the complete model, manufacturing part, suffix and any VE ordering identity to the installed nameplate.
- Confirm terminal block, channel type, field power, keying, wiring and system version before replacement.
- Record clear photos of the nameplate, connectors and installed position before removal.
- Treat this reference as an identification aid; the exact installed configuration governs compatibility.

Documentation basis

Prepared from Emerson Product Documentation retained for product verification. No external website or third-party document link is embedded in this PDF.
